

## Instructions

1. Using the templates, the pages marked A are for an older child. The ones marked B are for a younger child.
2. Cut out the templates.
3. To assemble the breastplate glue together the template pieces.
4. For extra strength, glue the assembled breastplate onto one side of a grocery paper bag. Cut it out of the paper bag.
5. Cut out the half oval template and trace it onto 2 or 3 different colors of construction paper.
6. Cut them out and glue them onto the assembled breastplate, starting from the bottom.
7. Cut out the neck strap pieces and then glue each piece onto a sheet of cardstock for strength.
8. Assemble the neck strap, cutting each piece to the desired length. (As shown in the picture at the bottom.)
9. Optional: Add Velcro to the neck strap and onto the breastplate if you want it to be held in place. This makes it removable. You can also use yarn and a hole punch if you choose not to use the neck strap.

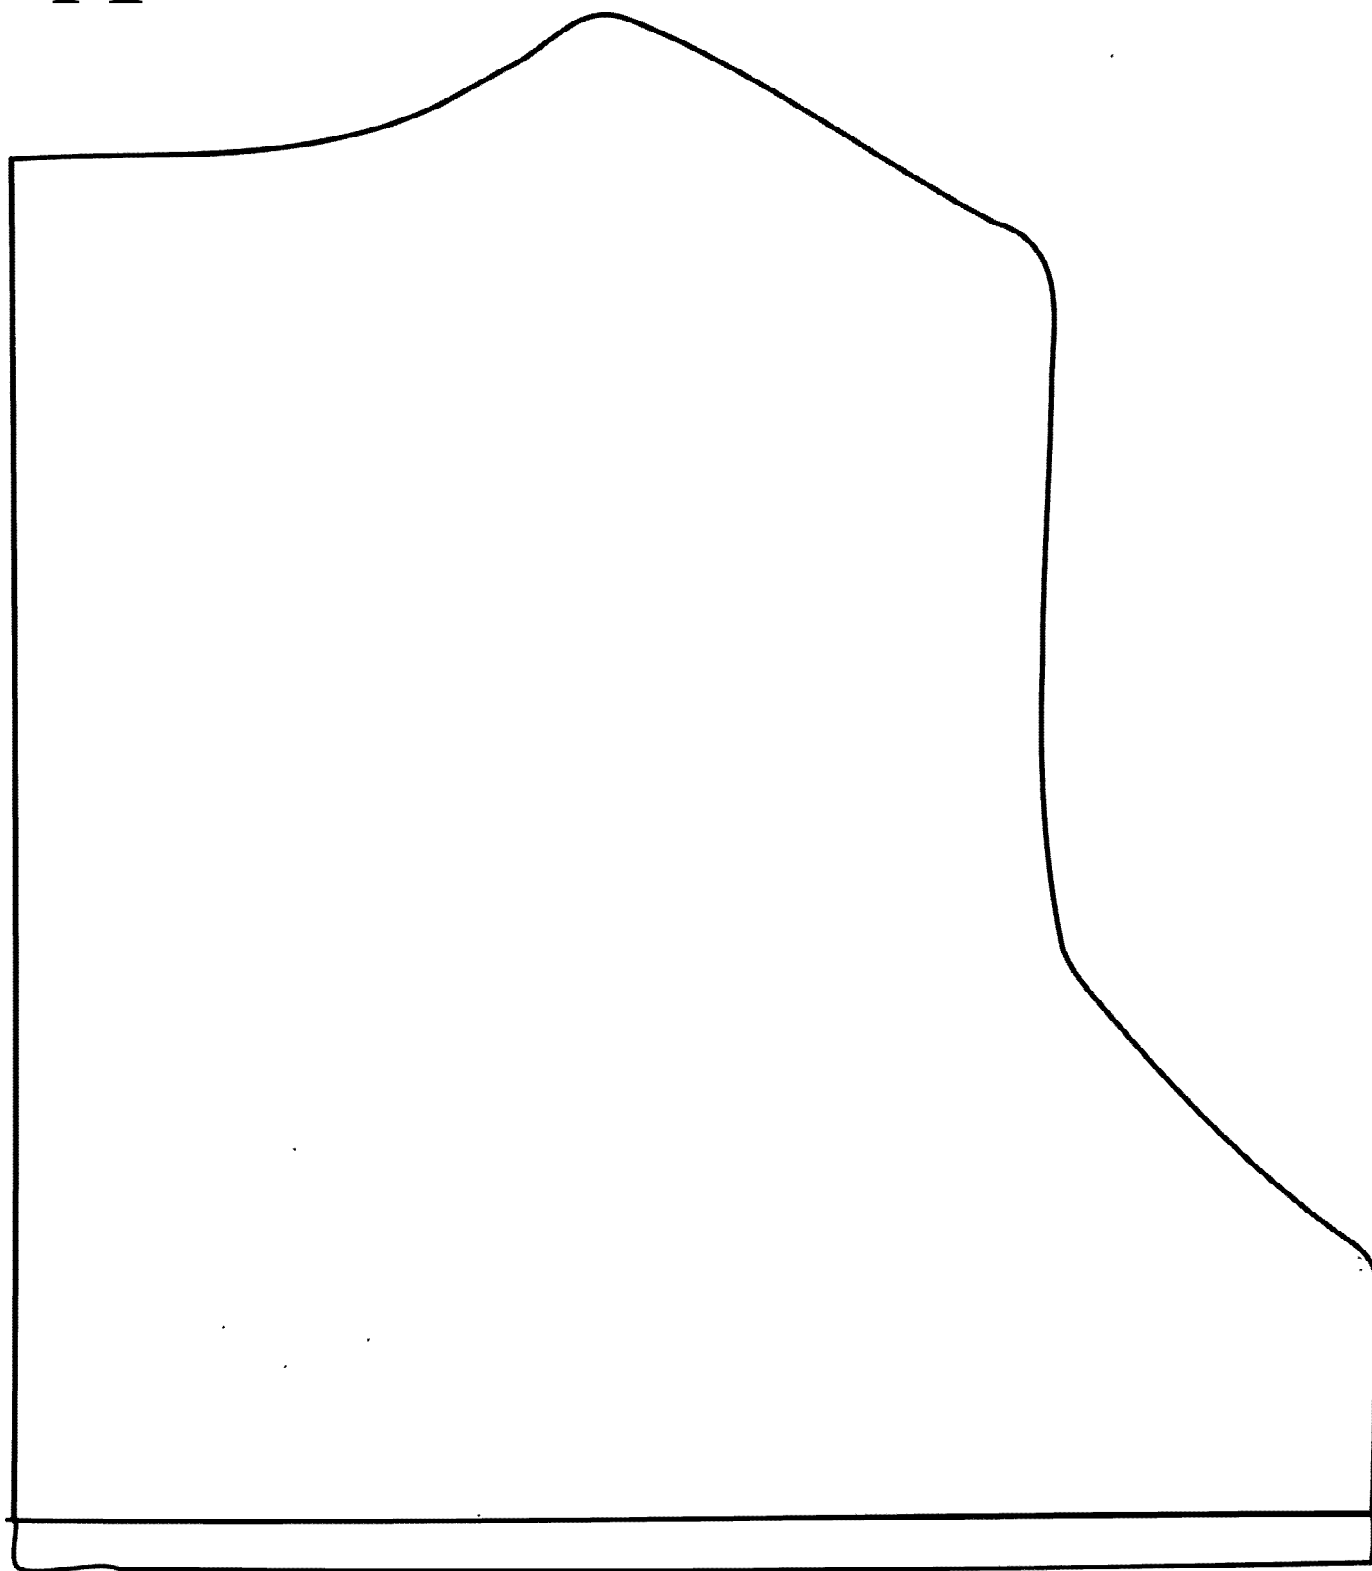

I have included the word “Righteousness” in case your kiddo wishes to place it along the chest area of the breastplate.
